

## MODULE DESCRIPTOR

<b>MODULE TITLE</b>	HISTORICAL FOUNDATIONS OF PSYCHOLOGY		
<b>MODULE CODE</b>	PS1710 (LEVEL 4)	<b>CREDIT VALUE</b>	20 CREDITS / 10 ECTS
<b>CAMPUS</b>	UCLAN CYPRUS		
<b>SCHOOL</b>	SCHOOL OF SCIENCE		

### MODULE AIMS

The aim of this module is to introduce students to the history of psychology through a consideration of landmark studies in psychology.

### MODULE CONTENT

Students will be introduced to, and consider, a range of psychological research. The module will include information on the history of psychology through a consideration of core psychological studies, presenting research evidence from a variety of areas of psychology to provide a context in which to understand the current state of the discipline. Psychological concepts and theories and how they relate to one another will be considered, alongside an understanding of how they might be applied in a variety of settings.

For example:

- Historical, philosophical, theoretical, and methodological backgrounds to psychology
- Biological bases to behaviour
- Sensation and Perception
- Consciousness
- Learning and the Behaviourist tradition
- Memory, Thinking and Language
- Intelligence
- Psychometric Testing
- Emotion and Motivation
- Groups and Group Processes
- Aggression
- Attitudes and Beliefs
- Skills Acquisition

For the areas covered the introduction and perspective taken will be primarily historical/classical thereby introducing students not only to the core concepts underpinning psychology but also core studies from a Psychology perspective. Thus, Behaviourism will be covered through an examination of the work of Pavlov and other eminent researchers from the field. Consciousness from the perspectives of philosophers such as Descartes and Locke through to more modern work by authors such as Dennett. Memory through the early work of Ebbinghaus (1883) and core studies such as those by Chase and Simon (1973) or covering skills acquisition through studies such as Baddeley and Longman (1978). Students will be expected to be introduced to the work of prominent researchers such as Bandura (aggression), Harlow (Social isolation), Milgram, etc. Thus, students will gain not only an understanding of the scope of psychology but importantly the core research that underpins the discipline.

### INTENDED LEARNING OUTCOMES

On successful completion of this module a student will be able to:	
1.	Define, identify and describe major topics and key concepts in the history of psychology
2.	Describe how psychological principles can be applied to a number of different areas of behaviour.

## **TEACHING METHODS**

Teaching will be delivered by a series of two-hour lectures. The assessment is a MCQ examination requiring a broad understanding of material on the module.

## **ASSESSMENT METHODS**

The module is assessed through an Essay and a Written examination.
