TEACHING METHODS

The module is delivered by means of lectures and workshops. The primary object of the lectures is to provide an outline of the subject matter and a framework for its understanding which students can use as a base for their independent study directed to the requirements of the workshops. The students build upon their understanding gained in the lecture session by reading specified cases, articles and appropriate textbooks in preparation for the workshops. The aims and learning outcomes of each individual workshop are clearly set out and students are encouraged to consider the short, self-help questions before taking the activities set for the group discussion. The workshops will be interactive and will incorporate a range of teaching and learning strategies including quizzes, debates, presentations, mooting, individual work, team work and other learning activities as appropriate.

ASSESSMENT METHODS

This module is assessed through a practice moot and a workbook.
