Prospectus

The image shows a large, modern university lobby. The ceiling is a complex grid of square panels with recessed lighting. The walls are primarily white with large glass windows on the right side. In the foreground, there are two circular, low-profile sofas. On the left wall, there are several informational posters, one of which is titled "THE UNIQUE LCLAN CYPRUS". The overall atmosphere is clean, bright, and professional.

Welcome to UCLan Cyprus

UCLan Cyprus Rector,
Prof. Panikkos Poutziouris
WELCOME ADDRESS

A warm welcome to the University of Central Lancashire Cyprus (UCLan Cyprus), the Enterprising British University, delivering educational and training programmes to local and international students, but also to professionals living and working in Cyprus and beyond.

The vision of the University of Central Lancashire Cyprus is to be recognised as a world-class, research-led University, competing successfully and sustainably within a national and international market. We are a University that is recognised for its commitment to outstanding teaching and practical learning, impactful research, innovative thinking and knowledge transfer that adds value to socio-economic and scientific development across frontiers.

Our faculty, scholars and research partners are distinguished for pioneering initiatives and engagement with industry, professionals, entrepreneurs and stakeholder communities. The interaction of research and knowledge transfer with high quality educational and training programmes ensures a currency of knowledge and skills development that will in turn lead graduates to employability routes and access to postgraduate activities.

Join us in your journey of learning and continuous professional development. Become a partner in our cooperative approach to research exploration, innovation and enterprise.

Our mission is to grow via smart strategies and international partnerships, building excellence in curriculum, teaching and learning, executive and professional training, innovative research, knowledge transfer and entrepreneurship in all fields.

In our continuous efforts to support the student experience, we are engaging strategically with vital partners including our UCLanian army of

alumni, to open opportunities for internships and to broaden the horizon for cooperation in terms of continuous professional development, research and innovative initiatives.

Internationalisation remains core to the University of Central Lancashire Cyprus, ambition and we will continue to develop our international engagement and reputation.

Our aim is to provide students with an international experience, increasing their intercultural awareness and to better prepare them for mastering the complex challenges facing our global economy and society. We invest in international exchanges and mobility of faculty, staff and students across UCLan UK, other globally ranked Universities as well as Corporate Partners.

We hope you are as enthusiastic as we are about our University's aspirations and we certainly look forward to taking pride in your progress and success.

A handwritten signature in black ink, reading 'P. Poutziouris'. The signature is written in a cursive style and is positioned above a horizontal line.

Professor Panikkos Poutziouris,
BA Economics, MBA, PhD
Rector

THE WORLD
UNIVERSITY
RANKINGS
2022 **TOP 1000**

The best of both worlds

The University of Central Lancashire Cyprus (UCLan Cyprus), is located in Larnaka, and it is now in its 9th year of operation. UCLan Cyprus is the first Branch Campus of the University of Central Lancashire and at the same time a fully licensed University in Cyprus. A unique and innovative model of a Cypriot and British University Educational Experience, **accredited by the UK Quality Assurance Agency and the Cyprus Agency of Quality Assurance and Accreditation in Higher Education (CYQAA) respectively.**

Built on strong academic foundations, the University of Central Lancashire (UCLan UK), our mother University, counts more than 190 years of history and is considered **among the top 6.8% of universities in the world by the Centre for World University Rankings 2021/22.**

It is worth mentioning that **Times Higher Education World University Rankings 2021 ranked the University of Central Lancashire in the United Kingdom among the 801-1000 best universities in the world.**

UCLan Cyprus operates under the academic umbrella of UCLan UK, and further to the recent political changes of the United Kingdom's exit from the European Union (BREXIT), it is considered a unique University, bridging the UK and Europe in terms of research, academic standards, student experience and student exchange.

The completion of Postgraduate studies at UCLan Cyprus will result in a **Double Degree (two certificates) from the two Universities, UCLan Cyprus and UCLan UK**, recognised not only in Cyprus and UK, but also across Europe and beyond. Our students will also have the advantage of an exceptional student experience in every aspect of their university life, whether it is learning, personal support, facilities, accommo-

modation, employability and social life, as well as personal development. Bringing a world-class reputation for academic excellence and innovative thinking in Cyprus, our aim is to develop future business leaders and international entrepreneurs, with the skills and business acumen for success in the modern global economy. This means that we can offer a unique blend of knowledge, practical experience and modern relevance, to equip students with the qualifications and skills for the international market in employment. Many of our courses are also accredited by professional and statutory bodies, ensuring the standards expected by today's businesses for all UCLan Cyprus students.

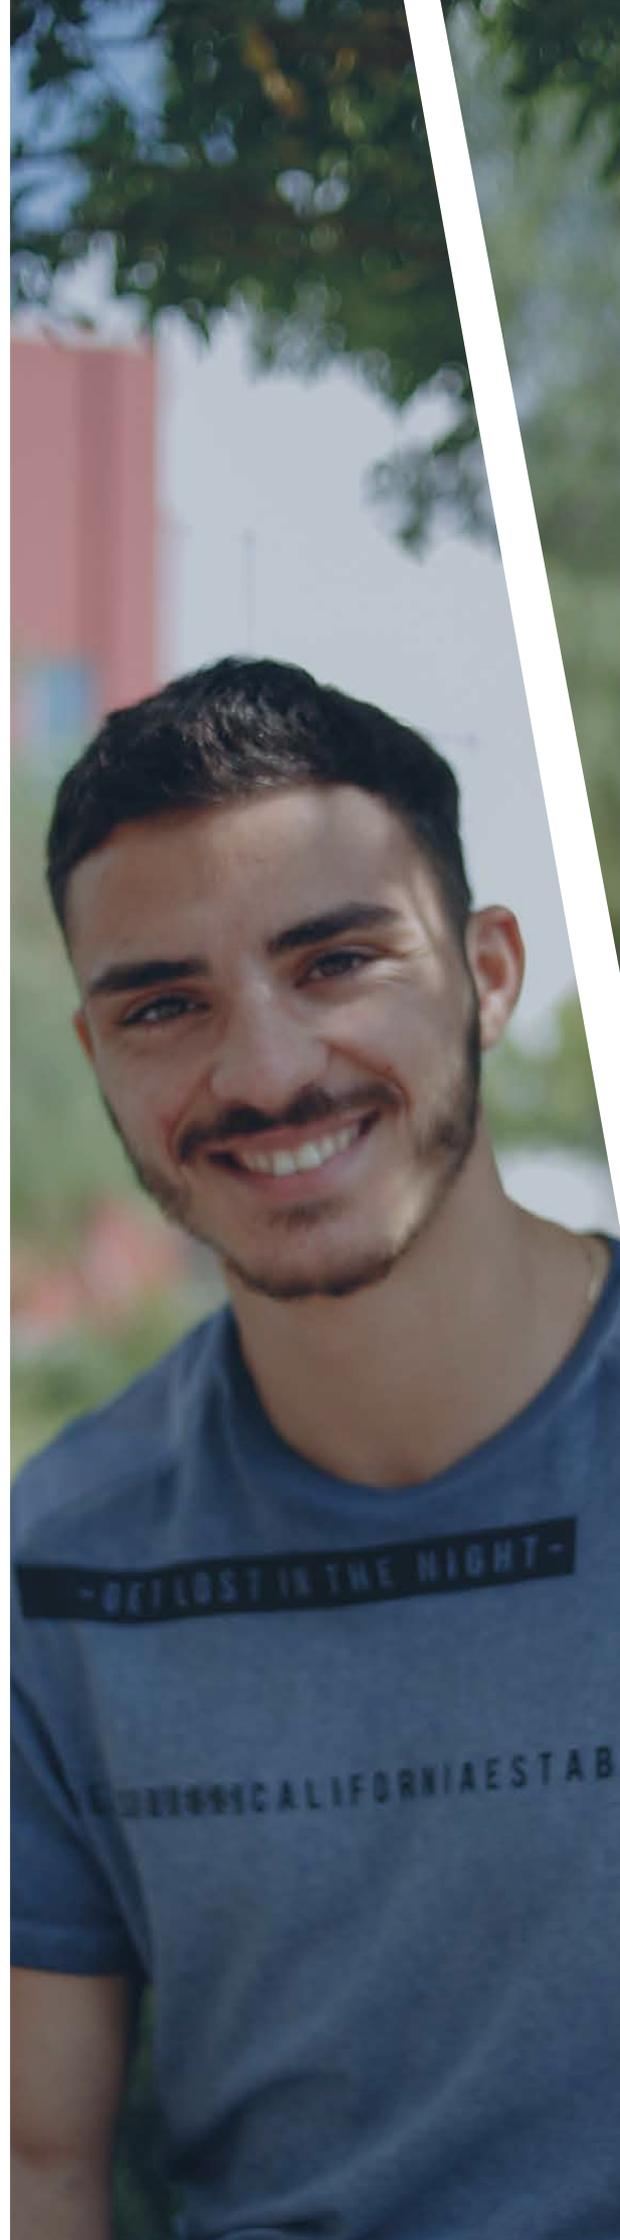

Our commitment to this ethos is at the heart of everything we do.

OUR VISION

The strategic vision of UCLan Cyprus is to build a leading, modern University with a global reach at the crossroads of three continents (Europe, Asia and Africa), providing both Undergraduate and Postgraduate Higher Education. UCLan Cyprus will be a well-recognised University for its commitment to the finest student University experience, outstanding research, innovative learning and valuable engagement with industries and communities within Cyprus, the Eastern Mediterranean, the Middle East industries and further afield.

OUR MISSION

- > Promote access to excellence, enabling you to develop your potential
- > Value and practice equality of opportunity, transparency and tolerance
- > Be a vital part of the social and corporate community, promoting innovation and development, both on national and international level
- > Strive for excellence in all we do: locally, regionally and internationally
- > Work in partnership with businesses, the community and other educators
- > Encourage and promote research, innovation and creativity

Research, Innovation & Enterprise

The University of Central Lancashire Cyprus is committed to being innovative and entrepreneurial in its approach to teaching, training, research and knowledge transfer, in order to enrich the University's academic learning environment, enable it to develop high value-added training initiatives, advance in innovation and promote high-impact research investigations. This will allow the University to enhance its contribution to social, cultural and economic development, both locally and internationally. As a research-led University, research and innovation is pursued via engagement with other research institutions and universities, industry, professions, government agencies, social enterprises and third sector stakeholders.

In line with the University's commitment to expand its research community and support early career researchers, UCLan Cyprus has appointed a number of joint PhD scholars, who work with international researchers in the University on joint collaborative research projects with UCLan UK and other universities nationally and across Europe.

Our research, innovation and enterprise are led by three centres, namely:

- **CEDAR** - Centre for Entrepreneurial Development, Alliance and Research
- **InSPIRE** - Centre of Interdisciplinary Science Promotion & Innovative Research Exploration
- **ICLAIM** - Interdisciplinary Centre for Law, Alternative and Innovative Methods

**CENTRE FOR
ENTREPRENEURIAL
DEVELOPMENT,
ALLIANCE AND
RESEARCH (CEDAR)**

CEDAR, is the first interdisciplinary and pioneering not-for-profit Centre for Entrepreneurship in Cyprus working with stakeholders, universities and academic centres, including UCLan Cyprus.

Its mission is to act as a catalyst for entrepreneurial development by building synergies between different areas of expertise in Education, training, research, outreach, and policy.

It builds bridges of cooperation with the entrepreneurial economy of Cyprus and beyond.

CEDAR faculty and associate fellows are credited with local, regional and global initiatives, focusing on fields including start-up entrepreneurialism, corporate entrepreneurship, innovation, SME - growth, entrepreneurial finance, governance, development of owner-managed family businesses, and alternative tourism development.

ENTREPRENEURSHIP INITIATIVES

CEDAR has been promoting several projects and initiatives in the field of entrepreneurship in partnership with a number of stakeholder organisations, including:

BUSINESS IDEA COMPETITION An annual initiative that aims to foster the development of creativity, innovation and new ventures through a series of idea generation workshops and start-up business training.

PANORAMA OF SOCIAL ENTERPRISE to showcase programmes and schemes in operation in Cyprus and Europe, geared to support social entrepreneurship and its impact in modern societies.

IDEAFEST COMPETITION An annual initiative that aims to enhance students' entrepreneurial skills in terms of business idea opportunity, identification and implementation across different sectors. The initiative involves evaluating students' proposals and awarding the best entrepreneurial ideas.

IDEODROMIO An annual initiative that aims to encourage entrepreneurship in secondary education in Cyprus. The initiative's target is to embed the entrepreneurial spirit to young aspiring students. "Ideodromio" is organised by CEDAR in collaboration with the Pedagogical Institute of Cyprus, the Cyprus Ministry of Education and Culture and KPMG.

PANORAMA OF INNOVATION to inform existing businesses and start-up entrepreneurs on innovation funding schemes and showcase successful cases of innovative enterprises in Cyprus.

CEDAR enjoys the support of various stakeholders and academic institutions such as the Cyprus Chambers of Commerce and Industry, University of Cyprus, Cyprus University of Technology, Ministry of Energy, Commerce, Industry and Tourism, Cyprus Business Angels Network - CYBAN, Youth Board of Cyprus, Cyprus Federation of Business and Professional Women, ANETEL, London-based EPISTEME and UK Cyprus Enterprise Council. Several initiatives are supported and co-organised by our valuable sponsors such as KPMG, Alpha Bank, Koumandari Foundation, Co-operative Savings Society of Larnaka -Famagusta, USB Bank, Cyprus Pedagogical Institute, Cyprus Ministry of Education, Culture, Sports and Youth, Synthesis and Gravity.

**CENTRE OF
INTERDISCIPLINARY
SCIENCE
PROMOTION
& INNOVATIVE**

RESEARCH EXPLORATION (INSPIRE)

The InSPIRE centre is a non-profit organisation led by School of Sciences Academics. InSPIRE was developed with the mission to support the advancement and development of scientific research by establishing a culture of innovative partnerships within different science disciplines (e.g. computing, data analytics, cybersecurity, engineering, mathematics, psychology, web design, media, and sports and exercise science) for the utilization of state-of-the-art practices and the realization of cutting-edge research and innovative programmes and activities. The main research clusters of the centre are focusing on Health and Society, Information Systems, Communication Networks and Mobile Technologies, Developmental Psychology and Educational Technologies.

To achieve the centre's vision, its resident members work closely with internationally respected and distinguished researchers, academics, industry professionals and policymakers to develop in three main areas: research, knowledge transfer, and service/outreach to the community and education. Some of the main activities of the Centre are focused on cutting-edge responsible research and innovation, undergraduate research projects and mentoring of undergraduate students, industry engagement (for the purpose of enhancing students' knowledge and practical skills, enhancing the existing curriculum and developing collaborative research projects), community engagement and outreach (promotion of science education, awareness on science impact, female participation in STEM and organisation of competitions, seminars, workshops and professional trainings for the community) and advisory/consulting services to local special interest groups.

**INTERDISCIPLINARY
CENTRE FOR LAW,
ALTERNATIVE AND
INNOVATIVE METHODS
(ICLAIM)**

The School of Law of UCLan Cyprus is very pleased to announce the cooperation with ICLAIM since February 2017. ICLAIM is an interdisciplinary centre for Law, Alternative and Innovative Methods, an independent, non-profit organisation, duly registered and based in Cyprus since 2017.

Visit <https://www.iclaimcentre.org/>

ICLAIM is proud to announce that out of the 30 laureates of the European Parliament's European Citizen Prize 2020 from 25 countries of the EU, ICLAIM is one of the two recipients from Cyprus! The laureates for Cyprus were announced by the European Parliament Office in Cyprus on 12 February 2021, being ICLAIM Founder, Prof. Stéphanie Laulhé Shaelou, on behalf of ICLAIM for its 'Social Mediation in Practice' programme, and Mr Costas Vichas for his long-term humanitarian assistance to those in need. Since 2008, the European Parliament awards the European Citizen's Prize every year to projects and initiatives that facilitate cross-border cooperation or promote mutual understanding within the EU. The prize, which has symbolic value, is also intended to acknowledge the work of those who through their day-to-day activities promote European values.

Find out more here:

<https://www.uclancyprus.ac.cy/iclaim-s-social-mediation-in-practice-project-receives-the-european-citizen-prize-2020-from-the-european-parliament/>

ICLAIM's Vision

ICLAIM envisions a society where citizens are empowered individually and collectively and enjoy access to social justice, through alternative and innovative approaches in the application of the law to societal issues, underpinned by high quality research and impact.

ICLAIM's Mission

As a social enterprise, to foster social dialogue and the rule of law through education and training and enhance active citizenship through knowledge transfer activities to groups of interested parties and the wider public. We are pioneering new solutions with wider impact on socio-legal challenges, at no or a fair cost.

ICLAIM's Objectives

- To create, promote and raise awareness of innovative and alternative legal solutions, including dispute resolution methods, widening access to social justice.
- To support socio-legal research and impact beyond academia, making a notable difference in society.

- 
- To create a space and share experience, knowledge and expertise with interested groups and the public at large, designing solutions tailor-made to their needs.
 - To enhance capacity building of interested groups and the wider public in the field of social justice.
 - To empower ICLAIM users and citizens more generally to find their own solutions to socio-legal challenges.

ICLAIM's Projects

ICLAIM produced a Handbook for professionals on social mediation in Cyprus and coordinated as an expert partner several conferences and workshops entitled 'Social Mediation in Practice' and 'Human Rights Education' held at UCLan Cyprus in 2018, 2019 and 2020. Participants included graduate students at the Law School, local communities, members of the police force of Cyprus and NGOs. They were trained on ICLAIM's Handbook, were given lectures from a socio-legal, psychological and informal education perspective and carried out interactive activities including on European and international tools. The workshops/conferences took place in the framework of projects funded by the Institute of Citizenship, Society and Change based at the University of Central Lancashire as well as by the British High Commission in Cyprus (intercommunal project on social mediation, 2019-20). The next step in the development of the Social Mediation programme is a new 'Social Mediation for Social Transitions' project delivered by ICLAIM with the support of UCLan Cyprus and a grant from the University of Central Lancashire Centre for Sustainable Transitions (UCLan CST). For more information on the project **visit** <https://www.social-mediation.org/>

In May 2018, under section 22 of the Alternative Dispute Resolution for Consumer Disputes Law of 2017 (L.85(I)/2017), the Consumer Protection Authority of the Ministry of Energy, Commerce, Industry and Tourism of the Republic of Cyprus approved ICLAIM as an Alternative Dispute Resolution (ADR) entity for (a) consumer goods contracts (online and non-online) as well as (b) consumer services contracts (online and non-online), including financial contracts, but excluding construction contracts. ICLAIM commenced its operations as an ADR entity in June 2018.

The University reserves the right to make amendments to programmes in order to improve the quality of learning content and outcomes.

Welcome to the School of Business & Management

Welcome to the School of Business and Management, the most enterprising School of UCLan Cyprus.

The School's mission is to offer practical and professionally relevant courses that equip students with knowledge, experience, analytical skills and enhanced aptitudes, which are in high demand in the marketplace. Our key measure of success is for our graduates to enjoy employability in managerial, professional and entrepreneurial pathways, contributing thereby to social and economic development.

All of us at the School are committed to be enterprising and innovative, shaping that way, developments at the forefront of the learning society and the knowledge economy.

We contribute thereby via our portfolio of Undergraduate and Postgraduate programmes that seek to expose our students to cutting edge developments in their fields of study.

Further, in co-operation with UCLan UK and other partners, we offer doctoral as well as continuing professional development (CPD) programmes that aim to establish the researchers and the highly employable professionals of the future. Our Faculty strive for excellence in pedagogy, research, knowledge transfer, and in building partnerships with our stakeholders, seeking to unlock growth opportunities in business, management and entrepreneurship for the benefit of our students, our alumni and the community, overall.

The pursuit of world-class innovative research and engagement with entrepreneurs, industry and the professions allows us to shape and inform new frontiers in theory, practice and policy at local and regional levels. Our academics lead research clusters, which are committed to innovative research in economics and sustainable growth, entrepreneurship, finance, governance and accounting, hospitality and tourism; innovative language and linguistics.

We are also proud of our partnership with the Centre for Entrepreneurial Development Alliance and Research – CEDAR, which is a not-for-profit organisation that promotes entrepreneurship across all walks of life.

Dr Loukas Glyptis, BSc, MSc, FHEA, PhD
*Assistant Professor of Accounting
Head, School of Business & Management*

BA (Hons) Business Administration

The BA (Hons) in Business Administration programme places emphasis on the functional, operational and strategic coordination of business activities. Throughout the course students develop an understanding of how organisational processes enable organisations to respond to external conditions in the market and the wider environment. Students gain a theoretical understanding of the nature of business and organisations, whilst developing practical skills, problem solving, risk assessment, group work and personal initiative.

This programme follows a rationale based on the principles of studying organisations as separate functions, interdependent operations and strategic entities.

It provides students with the necessary theoretical knowledge and managerial skills to be locally and internationally competitive. It promotes and emphasizes employability through modules such as “Employability and PDP” and “Personal and Professional Development for Business”. It cultivates innovative thinking through modules such as “Managerial Decision Making” and addresses contemporary issues in strategic planning, environmental scanning and operations management. Further to the traditional management route, the programme enables students to enhance their knowledge in a particular area by selecting a pathway in Finance, in HRM or in Marketing.

Career Options

Acquired knowledge covers a range of managerial topics that allows candidates to advance their management and business careers.

Employability is also embedded in this programme, which contains several features that support working lives; an emphasis on continuous learning and personal development, reflective practice, teamwork and client skills, and contact with business through applied projects and cases.

In addition, the subject material of the programme covers multinational and global corporations, local businesses, small and medium size enterprises, and start-ups. This broad applicability, combined with the personal capability that the programme engenders, creates highly competent individuals whose value is recognised by employers, as well as giving them at the same time the ability to become enterprising individuals.

BA (Hons) Advertising & Marketing Communications

BA (Hons) Advertising and Marketing Communications is a pioneering course which offers students the knowledge and practical skills to build a career in the dynamic and creative industry sector. This course focuses firmly on developing expertise needed to anticipate, analyse, plan, and control effective communications in an innovative approach that make generate value for client organisations.

The UCLan Advertising and Marketing Communications degree was designed as a result of extensive industry research to deliver graduates who would be 'purpose made' and 'job ready' for jobs in the industry. Understandably, this course has a strong practical element and gives students the knowledge and skills to gain a position in the emerging knowledge-based service economy.

Students will benefit from a variety of teaching and learning methods including: lectures, seminars, practical workshops, group activities, personal research and case studies. Personal study and independent research also form an integral part of the course. There are options to develop skills in a variety of areas such as IT, web-based tools and tactics, social media, advanced excel and specialist Microsoft packages. Assessment includes essays; reports; oral presentations; group assignments; investigating companies and tackling briefs from industry. In the final year students will have the opportunity to undertake an independent dissertation or company project.

Career Options

Graduates can pursue careers in media and communication firms but also marketing offices of mainstream organisations as advertising and/or promotions managers, marketing managers, marketing communications managers, public relations specialists, fundraising managers, media relations or communications officers.

- **BA (Hons)**
Accounting
& Finance
- **ACCA**

4 BOTH IN
YEARS

BA (Hons) Accounting & Finance

This degree covers all main areas of accounting and finance in terms of practical application and critical appraisal. It is designed for those wishing to pursue a career as a professional, Chartered Accountant, but also suitable for those wishing to pursue other careers in professional accounting qualifications, finance, or business management. The programme is therefore an excellent choice for those wishing to follow Accountancy, as it offers a blend of theoretical and practical application, combined with accreditation from professional accounting bodies and exposure to a broader knowledge of finance, which is relevant to a wide range of other business careers.

If you wish to pursue a professional accounting qualification, you will receive partial exemption from the professional accounting bodies examinations. In each year of the course, you will study a combination of accounting and finance modules, as well as modules supplemented by other disciplines [such as economics, business law and mathematics]. This programme is aligned with ACCA, CIMA and ICAEW, and in doing so a minimum 40% pass mark for ACCA and CIMA, and 50% pass mark for ICAEW for each module is required for the student to qualify for these professional exemptions.

The BA (Hons) Accounting and Finance of UCLan Cyprus presents its unique partnership with the Association of Chartered Certified Accountants (ACCA), which is the globally reputed professional accounting body offering the Chartered Certified Accountant professional qualification. Through this partnership the students that register with the UCLan Cyprus BA (Hons) Accounting and Finance programme, will be automatically awarded, upon enrolment, with 9 exemptions from ACCAs Fundamental Papers, provided that they complete successfully their undergraduate studies in the programme. This unique privilege gives our students the opportunity to start, along with their university studies, the professional papers of the ACCA qualification. This opportunity makes them more competitive in the marketplace, as it gives them the space to complete both their BA (Hons) Accounting and Finance and their ACCA qualification in four years or shortly after.

Career Options

Graduates who combine accounting and finance literacy with a broad appreciation of business economic issues are highly sought after by employers. They have a proven track record of succeeding in a range of employment sectors from accounting, finance and business. Few examples of companies currently employing our graduates are KPMG CY, Baker Tilly, MKS Chartered Certified Accountants, Minoshis Audit Tax Advisory LTD, A&P AuditQuality, Christos Makrides & Associates, K.Treppides & Co LTD.

Additionally, graduates master computational and calculation skills and techniques used in professional accounting practice; learn how to use specialized accounting software (such as Eurosoft Business, SAP Hana Fiori, and Powersoft 365 Accounting) and gain a direct advantage in the market because of their practical and technical appreciation of the accounting, finance and other commercial sectors.

This programme also provides a strong foundation for graduates seeking to enter other business and managerial functions (e.g. managing directors, consultants to private organisations and international organisations such as the World Bank, OECD and the EU), as well as related occupations such as insurance and banking, which have a strong business presence in Cyprus. High calibre graduates from the programme also have the opportunity to consider applying for an academic career in accounting by pursuing postgraduate and doctoral studies.

Accreditation/Link with Professional Bodies

The award is accredited for ACCA (9 exemptions), CIMA (8 exemptions) and ICAEW (8 exemptions).

The unique partnership with the Association of Chartered Certified Accountants (ACCA) provides significant privileges and opportunities for the students of the programme.

BA (Hons) Hospitality & Tourism Management

We are one of the top universities in the UK for the study of tourism and hospitality, ranked 8th for student experience and 11th overall, according to the Sunday Times, and 10th in terms of career within 6 months of graduation, in the Guardian League Table. We are also amongst the Top 100 universities in the world in the scientific field of Hospitality & Tourism Management, according to ARWU list (Shanghai Ranking). According to the Guardian University Guide 2021, the University of Central Lancashire (UCLan) is ranked in the top 3 universities in the United Kingdom in the field of Hospitality & Tourism.

This degree is designed to develop a responsive business approach to the international hospitality and tourism industries. The BA (Hons) in Hospitality and Tourism Management offers a high quality management education for those students who aspire to work within the hospitality and tourism industries.

The emphasis throughout the course is on the development of a wide range of professional and managerial skills, concurrently with the development of key personal and academic skills, aiming to improve the students' ability to understand and apply management theory to the hospitality and tourism sectors. An important aspect of the course is the combination of theory and practice, through the option of work placement, and frequent site visits, which give students the opportunity to experience real world settings, and understand the application of theoretical concepts in the practice of Hospitality and Tourism.

Career Options

The programme develops transferable skills relevant to a wide range of career opportunities in management, marketing or other relevant positions in different sectors of the tourism industry. Graduates of the course are able to pursue careers throughout the international hospitality and tourism industries.

Examples of graduate destinations include working for airlines, cruise ships, nightclubs, casinos, major hotel chains and restaurant groups, tourism development offices, theme parks, event planning offices, sport venues and major tour operators.

BA (Hons) English Language & Literature

Our English Language & Literature degree offers linguistic and literary perspectives on the study of English. You will be working with a range of materials, including classic literary texts as well as popular media texts such as advertisements, descriptions, analysis and interpretation of data, thus developing great skills for the workplace. You will cover a range of topics on how language works both structurally and persuasively and also how language is used in its various literary, social and cultural contexts for effect.

We offer a mix of traditional and innovative subject choices and consider new ways of thinking about English Language & Literature. You will be taught the processes of language through grammar and syntax, and you will also have the opportunity to study modules in stylistics. In addition to “literary greats” such as Shakespeare and Dickens, you will learn about contemporary fairy tales and film.

Career Options

The course is intended for students wishing to pursue a career in teaching or professional writing in a range of industries such as publishing, advertising, journalism, theatre, law and the public service. It helps them improve their literacy, develop profound knowledge, gain research and analysis abilities and enhance their oral and written communication skills. Our graduates go into a wide range of occupations such as teaching, publishing, journalism, arts administration, law, advertising and theatre.

MBA Master in Business Administration

PART-TIME STUDY ALSO AVAILABLE AS DISTANCE LEARNING.

The MBA is the world's most renowned business management qualification via an intensive programme, specifically designed for those wishing either to establish or sustain a successful managerial or professional career.

The course is an ideal platform for individuals who have acquired at least three years in a managerial, technical or professional role.

Taught by highly experienced and qualified tutors, who will provide guidance for the completion of an MBA dissertation, the MBA provides a rigorous process of personal and managerial development in which you are encouraged and expected to make your own unique contribution.

Career Options

Acquired knowledge covers a range of managerial topics that allows candidates to advance their management and business careers. Employability is also embedded in this programme, which contains several features that support working lives; an emphasis on continuous learning and personal development, reflective practice, teamwork and client skills, and contact with business through applied projects and cases.

In addition, the subject material of the programme covers multinational and global corporations, local businesses, small and medium size enterprises, and start-ups. This broad applicability, combined with the personal capability that the programme engenders, creates highly competent individuals whose value is recognised by employers, as well as giving them the ability to become enterprising individuals.

MA Hospitality, Tourism and Events Management

We are one of the top universities in the UK for the study of tourism and hospitality, ranked 8th for student experience and 11th overall, according to the Sunday Times, and 10th in terms of career within 6 months of graduation, in the Guardian League Table. We are also amongst the Top 100 universities in the world in the scientific field of Hospitality & Tourism Management, according to ARWU list (Shanghai Ranking). According to the Guardian University Guide 2021, the University of Central Lancashire (UCLan) is ranked in the top 3 universities in the United Kingdom in the field of Hospitality & Tourism.

The MA Hospitality, Tourism & Events Management offers the opportunity to study core modules whilst enabling further academic preference towards either the tourism or hospitality and event management sector. There is a strong focus upon employability within the service sector industries throughout the course and the management abilities required to work and succeed in this demanding and dynamic industry.

From the successful completion of studying principles and practice in tourism, hospitality and events and personal management development, the student progresses onto a specific period of internship within the industry. Appropriate work experience upon which reflective practice may be gathered in any four different, yet complementary forms of independent student learning exists, each reliant upon the individual's specific knowledge, personal interest and independent/professional career goal. The four forms of industrial practice are: a period of work placement within industry, the opportunity to mentor/shadow key personnel, contribution to a specific consultancy initiative or involvement within an active project management scheme. Our industry links provide scope for organisations to sponsor diligent scholars wishing to undertake this programme.

Career Options

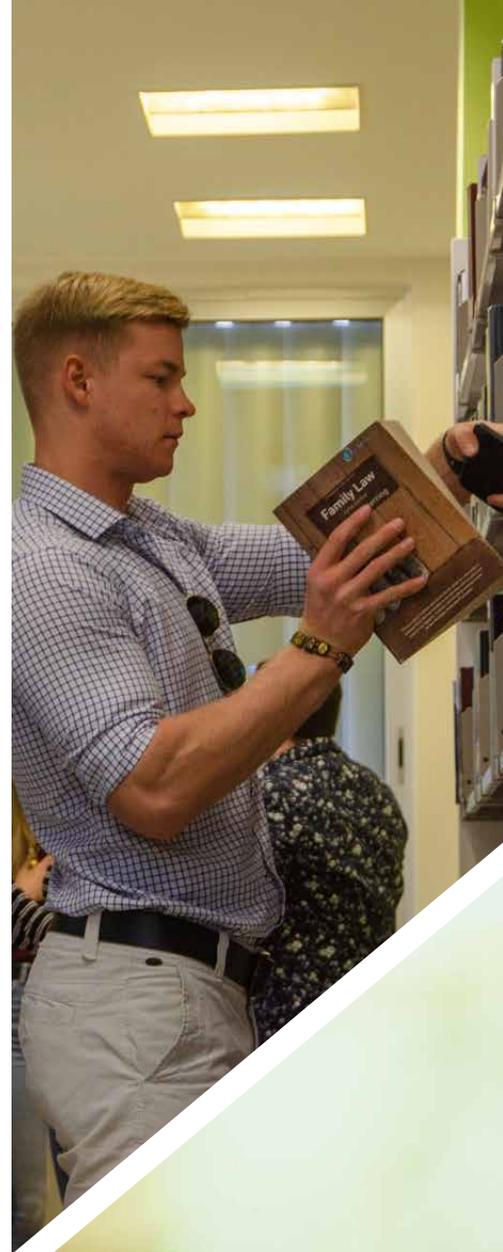

Acquired knowledge covers a range of topics that allows candidates to advance their management and business careers in a diverse range of sectors including, but not exclusive to, sustainability, event planning, tourism and hospitality.

Employability is also embedded in this programme, which contains several features that support working lives; an emphasis on continuous learning and personal development, reflective practice, teamwork, client skills, and contact with business through applied projects and cases.

MA

Educational Leadership

The MA Educational Leadership programme is designed for educational practitioners who wish to establish and expand their career by moving into an educational leadership position or role within their professional context.

The programme therefore provides a unique opportunity for personal and professional development and supports staff who need to evidence progression in leadership knowledge and skills. The modules and the programme have been carefully selected to help course members develop a repertoire of skills and knowledge relevant to a leadership role in education.

These include understanding the theory and practice of leadership and management, as well as obtaining a sound understanding of key aspects of curriculum design and learning technologies. This is essential if education leaders, managers and teachers are to employ the latest educational technologies to support innovative curriculum design to enhance the student experience.

A key element of the programme is the focus on developing research skills. This provides the foundation to undertake a detailed enquiry, using both primary and secondary sources, into an aspect of leadership as part of the triple project module that can focus on making a contribution to educational theory and/or improving practice.

Watch the following video by Dr Maria Zeniou, Course Leader and Assistant Professor in Educational Innovation and Research, to discover more about MA Educational Leadership at UCLan Cyprus.

Career Options

The MA Educational Leadership will create both promotion opportunities within existing educational settings and the possibility of moving from one part of the education sector to another. Since the course focuses on generic strategic leadership and management skills, these will be relevant and attractive to a wide range of professionals ranging from pre-school, the compulsory school sector, post-compulsory education (further, adult and higher education) as well as individuals within organisations in the private sector which have a training and development role.

The academic information contained in this prospectus is correct as at the time of printing.

Welcome to the School of Law

The School of Law is pursuing a clearly defined mission statement. Our key mission and prime objective is to offer responsible education designed to satisfy the requirements of the local and international professional market, whilst retaining the necessary focus demanded of a top-ranked Law School with internationally recognised research and knowledge transfer activities and complying with the highest professional and ethical standards. Through an intertwine between research informed teaching and impact informed research, the School aims to equip students, graduates, professionals and the wider public with superior social, legal and professional skills and build a bridge between independent learning and critical undertaking in the modern world.

Our Law students benefit from our digitally-driven multi-million Euro campus and facilities (including Cyprus' first Moot Court Room) to help them realise their academic potential, guided by academics of the School of Law of the University of Central Lancashire Cyprus through this learning and living process.

The full-range of academic and scholarly law courses are provided at the University of Central Lancashire Cyprus, including a PhD in Law, from UCLan UK, the highest achievement in academic scholarship.

Our students, graduates and alumni stand ready to face the professional world, including through our skills spines, our advanced skills training and professional courses, as well as our many co- and extra-curricular activities ranging from dining with the legal profession to international moots, and through our internship and graduate traineeship programme. As measurements of our success, many of our students have secured employment or work placements in Cyprus, the UK or Europe and have been commended for their good spirit, character, knowledge and work. They have also entered prestigious universities in the UK and other European countries for further studies and vocational courses in England and Wales to become Barristers or Solicitors, as well as in Cyprus, or wherever home is. We also make sure they develop an entrepreneurship mindset and guide them through the process of realising their own projects and ideas. Our robust growing alumni and professional network reinforces the School's culture of continuous professional development through the design and delivery of CPD and other short courses addressed to professionals under our Law Academy, www.uclancyprus.ac.cy/short-course/law-academy/

Finally, the School of Law is proud of its very active contribution to society through multiple public outreach activities and social engagement. In this respect and since 2017, the School works closely with a non-profit organisation called Interdisciplinary Centre for Law, Alternative and Innovative Methods ('ICLAIM') on projects of social entrepreneurship in full collaboration with academics, students and professionals.

Prof. Stéphanie Lauhé Shaelou

Maitrise de Droit (LLB), BA, LL.M, PhD, HEA Fellow, Certified Mediator
Professor of European Law and Reform and Head, School of Law

Bachelor of Laws LLB (Hons)

The course, unique to Cyprus, blends the English legal heritage with current English and Cyprus law. For the benefit of our local students, education on the two systems is combined within the modules and, in those instances where the law is very different, separate Cyprus law modules are provided. Thus, our local students will graduate not only with an outstanding knowledge of both English and Cyprus law, but also have knowledge of all legal terminology in both English and Greek, besides fluency in both languages - essential in an ever more globalised world. It is important to note that the course has been designed in such a way so that students can avoid if they want all instruction in Cyprus law, be taught entirely in the English language and follow a regular UK LLB curriculum. Like with any other UK LLB degree, the seven foundations of legal knowledge (Criminal Law, Equity and Trusts, Law of the European Union, Contract, Tort, Land Law and Public Law) are compulsory for all.

The theory of law is well represented at various levels, charting 2,500 years of legal philosophy, teasing out the classical foundations of modern law, including through Latin legal terminology and a deep explanation of common law principles. At the same time the LLB at UCLan Cyprus is extremely modern and skilful, placing strong emphasis at various levels on English laws, skills and practices of commercial contracts and companies which rule today's global business world.

The compulsory module European Union Law is supplemented at various levels, including with EU Single Market Law for those wishing to acquire detailed knowledge of the single market and the regulation of anti-competitive conduct in the EU. International Law is well served with modules in both Public International and Private International Law. In addition, human rights modules examine not only the European and International, but also the municipal legal architecture in the area of human rights as well as its applications in other fields such as Public Law, Criminal Law, Family Law, Employment Law or Medicine and the Law. Finally, conscious of Cyprus' continued international outlook and the increasing transnationalisation and modernisation of legal relations, modules are offered in Comparative Law, Consumer Law, Commercial Law, Business law and Company Law at various levels of the curriculum.

The LLB at UCLan Cyprus is the only Law degree on the island validated by the Solicitors Regulation Authority and Bar Standards Board of England and Wales. Exclusive in Cyprus, LLB graduates from UCLan Cyprus shall obtain the same qualifying law degree, with identical rights, privileges and entitlements, as any LLB graduate from an English or Welsh university. As a result, our graduates will have the opportunity to sit their professional law exams in London, for instance, without having to return to university in order to obtain a qualifying law degree first. During these challenging economic times, globally, it is important to know that a UK qualifying law degree is accepted by (law) professional bodies in a number of different countries around the world, including Cyprus and other countries of the Commonwealth.

Additionally, the LLB has also been recognised as a qualifying law degree by the Cyprus Legal Council.

YEAR 1

MODULES	SEMESTER	ECTS
COMPULSORY

The University reserves the right to make amendments to programmes in order to improve the quality of learning content and outcomes.

Career Options

Graduates will hold substantive legal knowledge and key transferable skills valued highly by employers. Law graduates are highly employable in a wide-range of careers: legal profession; public and private sector administration and management; advisory services; ancillary legal professions; legal enforcement and regulation services; business, banking, insurance and financial services; primary, secondary and tertiary education.

To help students, graduates and alumni in their professional development and career achievements, the School of Law proposes enhanced professional development opportunities.

Year 2-4: Additional Instruction in Cyprus Law

In addition to the modules (including Cyprus law modules) listed above, instruction (at no further cost) is offered also in the following subjects: Cyprus mooting skills; Cyprus Employment Law; Cyprus Contract Law; Cyprus Criminal Law; Cyprus Law of Torts; Cyprus Family Law and Cyprus Company Law.

Accreditation/Link with Professional Bodies

Cyprus has been accredited by the Solicitors Regulation Authority and Bar Standards Board (respectively the regulatory bodies for solicitors and barristers in England and Wales). With this important accreditation, the LLB at UCLan Cyprus is recognised as a qualifying law degree, providing exemption from the academic stage of professional legal training for those who wish to become solicitors or barristers. Additionally, the LLB by UCLan Cyprus has also been recognised as a qualifying law degree by the Cyprus Legal Council.

YEAR 3

All modules on the LLB are taught in English.

*For modules that are concerned with the law in Cyprus, significant emphasis is placed on Greek terminology. These are all optional modules.

YL= YEAR LONG

The University reserves the right to make amendments to programmes in order to improve the quality of learning content and outcomes.

Master of Laws LLM

The LLM at UCLan Cyprus will enable students to focus on a range of very different subjects of use in their professional careers but also specialise in a range of exciting fields of law for those preferring a narrower focus. By introducing new, special option modules, five areas of concentration have been developed in the fields of:

- > International Energy Law
- > European Union Law
- > Law and International Security
- > International Business Law (offered also as specialised LLM)
- > Financial and Commercial law (offered also as specialised LLM)

The LLM Master of Laws is available to students with a legal and non-legal background. Seminars are delivered during the late afternoon and evening to facilitate both working professionals and recent graduates. The language of instruction is English. Emphasis is placed on private study and research, assisted by the University's outstanding law resources and databases as directed by tutors. Therefore, class contact time is limited reflective of a desire to offer a world-class course of interest to the talented, serious and dedicated student, whilst providing the necessary flexibility for anyone juggling other professional and personal commitments.

The University reserves the right to make amendments to programmes in order to improve the quality of learning content and outcomes.

Career Options

Past UCLan graduates have gained or developed careers in diverse legal, professional, commercial and regulatory fields.

UCLan has Recognised Course Provider (RCP) status with the Chartered Institute of Arbitrators (CIARB) in the areas of domestic and international arbitration. Students passing this module will be eligible for Associate Membership of the Chartered Institute of Arbitrators, allowing them to use the post-nominal letters ACIARB subject to CIARB's requirements.

**Successful completion of this module offered at an additional cost allows for registration as a Mediator with the International Mediation Institute, Civil Mediation Council, UK and/or the Ministry of Justice and Public Order of the Republic of Cyprus (subject to their registration requirements).

***UCLan Cyprus is a CISI University Partner. Specific LLM modules lay the ground for certification by the Chartered Institute for Securities and Investments (CISI).

LLM Financial & Commercial Law

The School of Law of UCLan Cyprus is proud to announce the LLM Financial and Commercial law. Within finance and commerce, law is a fast-changing and increasingly complex area. The LLM Financial and Commercial Law will enable students to specialise in a range of exciting subjects within the area of Financial and Commercial Law, of use for their future professional career in law, business or in financial fields, both nationally and internationally.

This postgraduate course provides students with analytical and reflective skills and expertise in Financial and Commercial Law. It provides a learning experience which will enable students to strengthen their academic ability and enhance their performance in employment, as well as further develop their career opportunities. It provides the successful candidate with a recognised postgraduate qualification in Financial and Commercial Law.

The LLM Financial and Commercial Law is available to students from both a legal and non-legal background. Classes are taught during the late afternoon and evening. Emphasis is placed on private research and study, assisted by the University's remarkable law resources and databases. Therefore, class contact time is limited; reflective of a desire to offer a world-class course of interest to the talented, serious and dedicated student only, whilst providing the necessary flexibility for those juggling other professional and personal commitments.

Welcome to the School of Sciences

Welcome to the School of Sciences! At our School you will find endless opportunities to engage with a diverse group of students and faculty that will inspire you to learn and grow. We prepare students to become future leaders, competent and ethical professionals, possessing the ability to work in a global environment, and who can make effective and meaningful contributions to the scientific community.

Through a unique and innovative curriculum that reflects current and future industry practices and needs, we offer a wide range of Undergraduate and Postgraduate academic courses in disciplines such as Computing, Web Design and Development, Mathematics, Engineering, Psychology and Sport & Exercise Science. In addition to the traditional programmes within each discipline, the School offers some unique programmes, especially at the postgraduate level, such as, MSc Data Analytics, MSc Cybersecurity and MSc Forensic Psychology. As with all programmes at UCLan Cyprus, our courses offer a double-awarded degree: a degree from UCLan UK and a degree from UCLan Cyprus, both accredited by the UK Quality Assurance Agency and the Cyprus Agency of Quality Assurance and Accreditation in Higher Education (CYQAA), respectively.

Our faculty includes an outstanding group of scholars who are highly research active and who continuously pursue new knowledge and innovative ways to apply it through research. The School adopts an interdisciplinary approach in its research activities, trying to bring together expertise from the various disciplines to pursue cutting-edge responsible research and innovative activities to address complex challenges in our community and around the world. Moreover, the School cultivates a culture of unique partnerships between academia, industry, public authorities and the community in order to facilitate and promote the utilization of state-of-the-art practices. I would encourage you to look at the academics' profiles on our website to find out more about them and their work.

If you are interested in pursuing a career in a science field and wish for a world-class education, we are happy to help you choose one of our exciting programmes to study at our prize-winning campus.

Prof. Irene Polycarpou, BSc, MSc, PhD
Head, School of Sciences

BSc (Hons) Mathematics & Statistics

The BSc (Hons) Mathematics and Statistics is a programme of study that covers topics across the whole range of mathematical areas and statistical fields, with opportunity to specialise further on statistics.

Our curriculum is built on a variety of themes, which run through all academic years of the programme; mathematical methods, statistical methods, analysis, probability, algebra, mechanics, computational mathematics, computational statistics and data analysis.

A variety of innovative teaching and assessment methods challenge the students to apply their mathematical and statistical knowledge and skills to real-world problems. Moreover, the programme develops communication skills, such as delivering oral presentations and designing conference style posters. The latter years of the programme have a number of specialist optional modules that will enable students to focus their degree towards their personal interests.

Overall, the BSc (Hons) Mathematics and Statistics programme provides students with sufficient in-depth knowledge to enable them to embark on further studies or apply that knowledge in the industry.

Graduates of mathematical sciences can be employed in several areas, such as education, biology, economics, engineering, genetics, marketing, medicine, psychology, public health and sports, and work as statisticians, data analysts, risk analysts, biostatisticians and quality analysts, among many.

YEAR 1

MODULES	SEMESTER	ECTS
COMPULSORY		
Discrete Mathematics	YL	10
From Geometry into Algebra	YL	10
Functions, Vectors & Calculus	YL	10
Introduction to Probability & Statistics	YL	10
English Language I	1	10
English Language II	2	10

YEAR 2

MODULES	SEMESTER	ECTS
COMPULSORY		
Introduction to Algebra & Linear Algebra	YL	10
Introduction to Real Analysis	YL	10
Introduction to Mechanics	YL	10
Computational Mathematics	YL	10
Theory of Probability & Statistics	YL	10

COMPULSORY		
Ordinary Differential Equations	YL	10
Further Real Analysis	YL	10
Numerical Analysis	YL	10
Linear Models	YL	10
OPTIONAL		
Vector Calculus	YL	10
Nonparametric Statistics	1	5
Survey Methodology	2	5
Algebraic Structures	YL	10
Cryptology	YL	10
University elective	YL	5/10

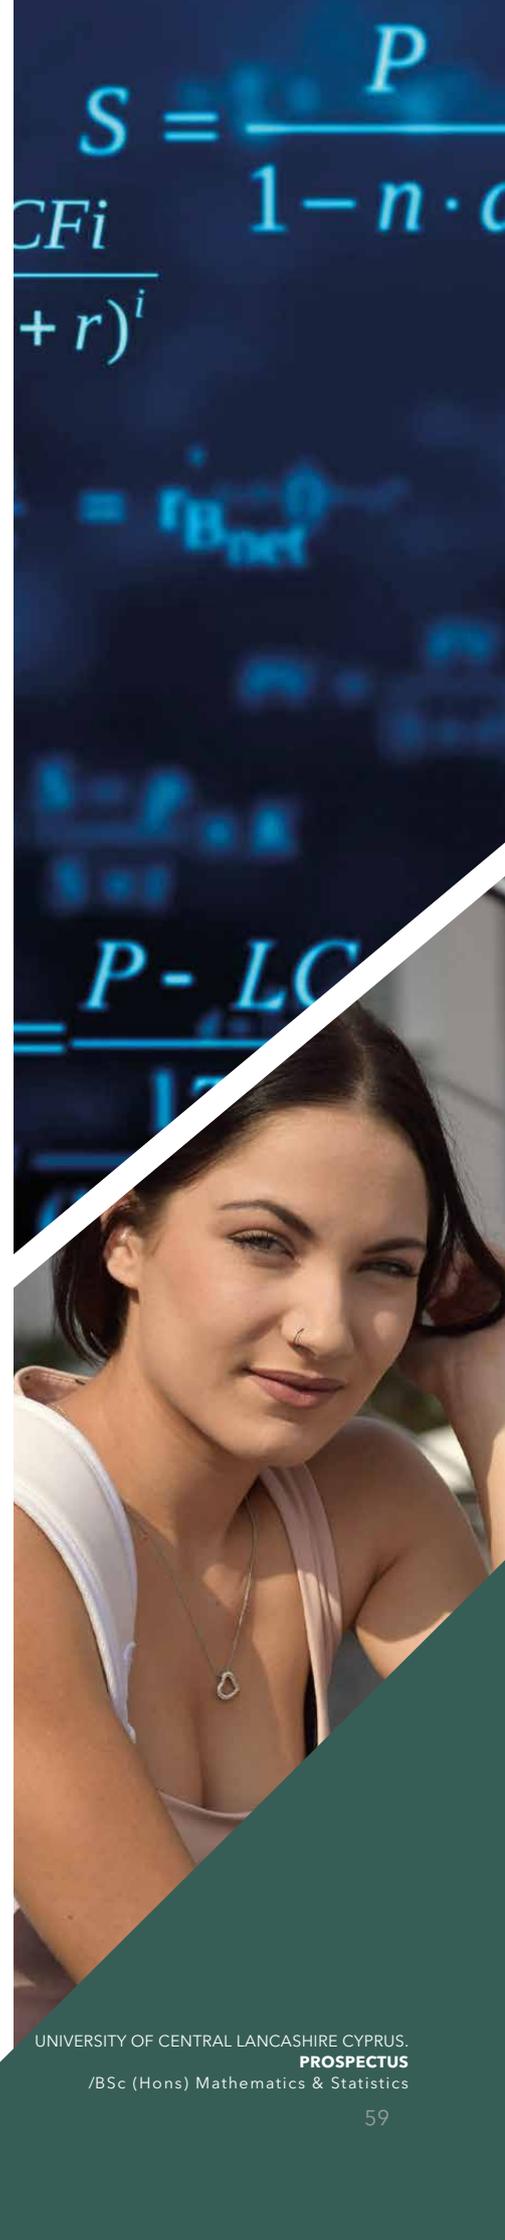

YL= YEAR LONG

The University reserves the right to make amendments to programmes in order to improve the quality of learning content and outcomes.

Career Options

Mathematics offers a diverse and rewarding range of careers. Examples include working in education, academic research, consultancies, accountancy, financial services, insurance companies, IT and Computing, telecommunications, and healthcare to name but a few sectors. For further information you can visit www.mathscareers.org.uk (managed and maintained by the Institute of Mathematics and its Applications). These are valuable contributions to the Cypriot economy and equip both local and international students to compete in the global employment market.

Mathematicians and Statisticians are ranked by www.careercast.com as some of the best jobs based on criteria including income, job outlook, work environment and stress. Other highly ranked jobs including those of a data scientist and of an actuary are highly mathematical and attract many people with a very strong mathematical background.

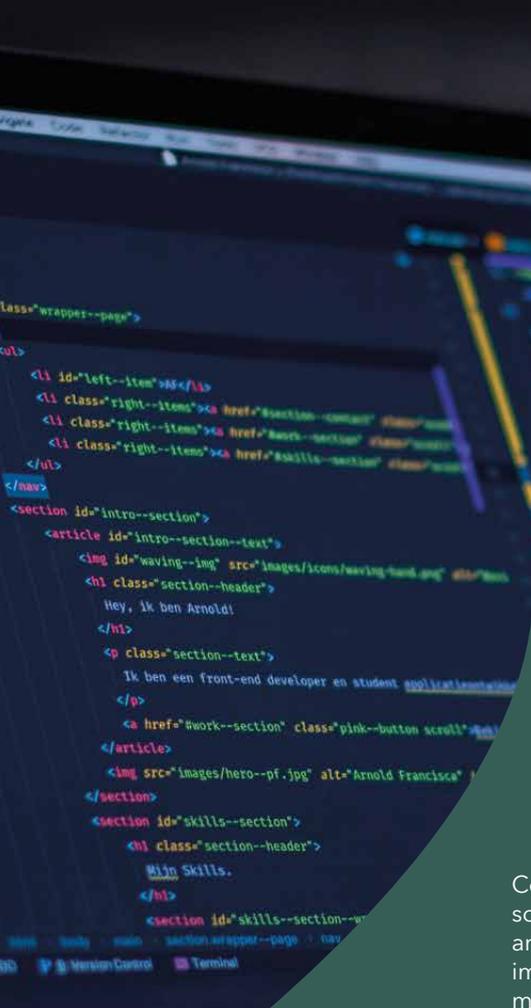

YEAR 4

MODULES	SEMESTER	ECTS
COMPULSORY		
Complex Analysis	YL	10
Stochastic Processes	YL	10
Computational Statistics & Data Analysis	YL	10
Time Series OR	YL	10
Multivariate Analysis	YL	10

Operational Research	2	10
Actuarial Mathematics & Statistics	2	5
University Elective	YL	5/10

YL= YEAR LONG

The University reserves the right to make amendments to programmes in order to improve the quality of learning content and outcomes.

BSc (Hons) Computing

Computing is a creative activity which applies appropriate technology to the solution of problems. Computing professionals are involved in the investigation and analysis of problems, the design and evaluation of feasible solutions and the implementation of cost-effective ways of meeting user needs. They must communicate with a wide range of people (managers, users and colleagues) and be aware of the business implications of the decisions made.

Our BSc (Hons) Computing students learn how to stay up to date with the latest tools and techniques and practice their application to real-world problems. The programme offers optional modules that focus on the specialised areas of:

> Software Engineering

Develop specialised knowledge and skills to become a full stack and highly employable software engineer.

> Computer Games Development

Train in computer games development with specialised skills in games programming and 3D computer graphics in our state-of-the-art game studio.

> Computer Networks and Security

Engage with the latest network and communication technologies and leverage the opportunity to achieve professional certifications such as Cisco CCNA, AWS Cloud Essentials and LPI Essentials.

The programme's diverse curriculum and highly practical focus equip our graduates with the necessary skills to have a successful career in the industry. The programme is proud of its high student satisfaction rate, internship and placement offerings, technology-enhanced learning environment, high employability rate and industry collaborations.

Our BSc (Hons) Computing programme is accredited by the British Computing Society (BCS), the Chartered Institute for IT, as meeting the academic requirement for registration as a Chartered IT Professional (CITP), and by BCS on behalf of the Engineering Council of the UK, as meeting the academic requirement for Incorporated Engineer (IEng) and partially meeting the academic requirement for Chartered Engineer (CEng). The programme is also recognised by the Cyprus Technical and Scientific Chamber (ETEK).

YEAR 1

MODULES	SEMESTER	ECTS
COMPULSORY		
Introduction to Programming	1	10
Explorations in Computing	2	10
Introduction to Networking	YL	10

YL= YEAR LONG

The University reserves the right to make amendments to programmes in order to improve the quality of learning content and outcomes.

Career Options

A range of careers opens to students upon completion of their degree. These include roles in business requirements analysis, design and development of database-backed systems, development of web and mobile applications, computer games development, system testing and management, wired and wireless networks management, network security, and many more. Moreover, the broad skills that our students acquire enable them to remain competitive in the fast evolving area of computing technology.

Link with Professional Bodies

Course Graduates are eligible to register to the Cyprus Scientific and Technical Chamber (ETEK).

BCS Accreditation

This degree has been accredited by the British Computing Society (BCS), the chartered institute for information technology (IT). The BCS is committed to making IT good for society. This accreditation is a mark of assurance that the BSc (Hons) Computing degree offered at UCLan Cyprus entitles our graduates to professional membership of the BCS, which is an important part of the criteria for achieving Chartered IT Professional (CITP) status. Some employers recruit preferentially from accredited degrees, and an accredited degree is likely to be recognised by other countries that are signatories to international accords.

YEAR 3

MODULES	SEMESTER	ECTS

BSc (Hons) Web Design & Development

In the last few years, businesses worldwide have progressively become digitally oriented. As a result, digital media, technology and web related practices are becoming more and more popular. The BSc (Hons) Web Design and Development programme combines a number of topics as they apply to the Digital Society and Digital Technologies.

The programme includes digital media emerging areas, such as video and audio production, graphic design, animation, digital content creation and management, special effects, web design and development, web application design, UX and UI design, social media management and search engine optimisation. Programme graduates will be able to apply their knowledge in different disciplines, such as web and app design and development, audio-visual production, multimedia production, social media management, internet marketing, SEO, SEM, online word of mouth, digital storytelling, e-business, e-commerce and mobile commerce.

Employability is also embedded in the programme, which contains several elements with emphasis on industry work, continuous learning and personal development, reflective practice, teamwork and problem-solving skills through applied projects. This broad applicability of the programme, combined with the personal capability that the programme engenders, creates highly competent individuals whose value is recognised by employers.

YEAR 1

Research Project	YL	10
Work as Practice	YL	10

YL= YEAR LONG

The University reserves the right to make amendments to programmes in order to improve the quality of learning content and outcomes.

Career Options

Nowadays, there is high employability potential for students studying Web Design & Development, and this is expected to be increasing in the future, as information communication technologies continue pushing into new frontiers. With the rapid advancement of technologies, qualified and skilled professionals are becoming more and more essential for almost all industry sectors. The programme's content diversity equips graduates with the necessary expertise to be employed in different sectors (industry, private or government) and as part of different departments, including web development, web design, e-commerce, graphic design, multimedia or advertising. Additionally, graduates are employed in digital/multimedia agencies, advertising agencies, consultancy firms or even start their own businesses.

BSc (Hons) Psychology

The BSc (Hons) Psychology programme offers theoretical knowledge and practical application of psychology to real world problems. Students will learn about the mind and behaviour, enabling them to understand the way people act, react and interact. They will consider the roles of the brain and the nervous system upon behaviour, perception, mood and memory. The overall aims of the programme are to:

- > Provide a stimulating and supportive learning environment that gives the opportunity to develop potential;
- > Provide an up-to-date curriculum in psychology that emphasises the development of skills and knowledge related to the scientific and empirical aspects of the discipline;
- > Provide choice and flexibility in the curriculum while maintaining those core aspects of the syllabus needed to secure British Psychological Society recognition;
- > Foster the development of key skills that will facilitate further academic and vocational training and subsequent employment;
- > Provide students the opportunity to get involved in research, in collaboration with research active psychology faculty, thereby learning first-hand about the scientific method.

The programme also includes specialised optional modules which provide students the opportunity to concentrate on specific areas of study within the field of Psychology, including **Forensic Psychology, Clinical Psychology and Neuropsychology**.

Furthermore, one of the most distinctive features of the programme is the Psychology Placement module that provides the opportunity to students to experience the application of psychology in a setting relevant to their degree.

**The British
Psychological Society**
Accredited

YEAR 1

Topics in Psychology	YL	20

YL= YEAR LONG

*Compulsory for students on the advanced entry .

The University reserves the right to make amendments to programmes in order to improve the quality of learning content and outcomes.

Career Options

Studying psychology provides you with a wide range of skills that span both the arts and the sciences. Therefore, this opens up opportunities with a wide variety of employers. Aside from the professional (Chartered) roles available for graduates to progress onto, there is a range of graduate careers including roles in project management, data analysis, human resources, local authority and law enforcement. Other students undertake further training and consider careers in law, teaching, the Probation Service, speech therapy, social work, or other allied health roles.

BCS Accreditation

The British Psychological Society (BPS) visits courses every five years to review and determine the accreditation from the professional body. Our 2016 visit was particularly successful and secured the accreditation for the Psychology course for all our graduates completing the course with a second class degree or better. They commended the course on seven areas of provision. The first of which was that Psychology staff members provide a supportive and nurturing learning environment for students. Also, BPS commended that the programme incorporates a range of exciting research and placement opportunities for students, enabling them to experience a range of 'real world' psychological research and practice first-hand. They also noted that employability and psychological literacy are embedded thoroughly and effectively across the programme.

Therefore, UCLan Cyprus is the first University in Cyprus that provides an accredited Psychology course by BPS.

YEAR 3

MODULES	SEMESTER	ECTS

BSc (Hons) Sport & Exercise Sciences

In today's society, sports and physical activity is an increasingly important part of life for more and more people. Those involved in sports and physical activity are consistently striving to improve their performance, either as professionals, elite, amateurs, or purely for recreational and personal reasons. Sport and Exercise Sciences is a systematic way of studying how performance can be improved and how individuals can achieve their personal potential. It is within this context that our BSc (Hons) Sport & Exercise Sciences programme prepares graduates for a successful career in an exercise related field, by placing strong emphasis on both, theoretical knowledge and practical application. Our programme will appeal to those with an enthusiasm for sports and those who want to take an active role in the promotion of health and physical activity combined with an interest in science from a human perspective. A strong feature of the programme is that it provides a particularly solid understanding of the sport and exercise science discipline in years one and two. The third and fourth years build upon this foundation with an increased focus on students' specific interests as well as providing placement opportunities for students to enhance their employability skills.

Beyond the discipline specific knowledge and skills, throughout the programme, students can develop essential transferable skills, such as research skills, digital literacy skills, communication skills, group-working and presentation skills. In each of the four years of the programme, students will study compulsory and optional modules which will allow them the flexibility to follow their own interests as they develop during their studies, including a focus on areas such as Human Performance, Sports Psychological Counselling and Physical Education. Moreover, students will have the opportunity to train on the finest learning, exercise and human performance laboratory equipment.

The programme curriculum is research informed and highly practical, enabling graduates to work with professional athletes of any division and/or sport. Students can work with a range of clients including children and teens involved in sports, professional or semi-professional athletes interested in improving their performance as well as injured athletes/players working toward returning to sports participation. Practical application occurs in the campus fitness centre, athletic track, indoor hall and the sports laboratory, but most importantly in off-campus fieldwork and industry placements.

BEng (Hons) Electrical & Electronic Engineering

The BEng (Hons) Electrical and Electronic Engineering aims to develop Engineers with a broad understanding of current technology and practice trends in Electrical and Electronic Engineering, covering a wide range of topics related to power and electronic systems. This discipline encompasses a wide skills base and the course equips graduates with the knowledge, skills, professionalism and confidence to thrive in the always-evolving field of Electrical and Electronic Engineering, as well as gaining the transferrable skills to find employment in a diverse set of industrial, commercial and research sectors.

Through special option modules, this course can provide graduates with expertise and specialisation in areas which are rapidly evolving and have, possibly, the highest employability potential in Engineering:

- > Telecommunications and Mobile Technologies
- > Renewable and Sustainable Energy Systems

Employability is central to our degree provision and through this programme students will develop the necessary electrical and electronic engineering skills to ensure their successful career in this field. Course delivery allows students to concentrate in their chosen area depending on module choices, including Telecommunications, Mobile Technologies, Renewable Energy Systems, Digital Design, Electronics and Power Systems. This ensures their studies are shaped to suit their career aspirations.

We consider practical experience an important component of our students' future employability. Through a number of modules, students will have the opportunity to get hands-on, practical understanding and experience to enhance their skills. Industrial placements may also be available for students to broaden their practical work experience and to consolidate their learning, as well as establishing a professional network which can provide them with a significant advantage in their early career development.

BEng (Hons) Computer Engineering

The BEng (Hons) Computer Engineering programme aims to provide graduates with a broad understanding of current technology and practice in computer engineering, covering the relevant aspects of Digital and Analogue Electronics, Microcontrollers and Computer Architectures, Programming and Operating Systems, Software and Hardware Engineering, Networking, Robotics as well as additional specialist areas according to the option modules studied.

The discipline of Computer Engineering encompasses a wide skills base and the emphasis of this programme is placed on Computer Hardware, Networking and Robotics. It encompasses elements of system-level design, programming and mathematical principles. The programme equips graduates with the knowledge, practical skills and confidence to thrive and develop to gain suitable employment in the rapidly changing world of Computer engineering. The skills gained on the programme are also transferable to a diverse set of industrial and commercial sectors.

MSc Computing

Computing-related technologies, such as new mobile devices and applications, are changing the way we communicate, do business and access news and entertainment.

The MSc Computing programme allows students to select optional modules so that they can focus on specific computing areas, including web and mobile application development, networking and IT security, user experience and digital marketing, and computing technologies and systems.

Throughout the programme, students will be able to develop skills and understanding necessary for the development of software systems and they will have the opportunity to plan, undertake and evaluate a substantial computing project, enabling them to become reflective and research-aware practitioners. Moreover, they will be able to develop other essential skills, such as communication skills, critical thinking and self-management skills, which can be applied in all walks of life.

Through specific modules, the MSc in Computing programme provides students the opportunity to achieve professional certifications that are in great demand by the industry, such as Cisco CCNA, AWS Cloud Essentials and LPI Essentials.

Artificial Intelligence	2	10

YL= YEAR LONG

The University reserves the right to make amendments to programmes in order to improve the quality of learning content and outcomes.

Career Options

This programme, building on the intellectual skills of a computing or technology related degree, enhances students' employment prospects in the IT field, and further develops the skills they obtained in their Undergraduate degree. The skills acquired can lead to a range of careers in computing specialisations that are in high demand (even outside the technology sector), such as networks and IT security or web and mobile application development.

MSc Cybersecurity

ALSO AVAILABLE AS DISTANCE LEARNING

The constant advancement of technology and the introduction of cloud services, smart devices and wireless communications as well as the increasing penetration of the Internet in our everyday activities and the sharing of sensitive information through it, have created a need for information assurance and data security.

This programme will appeal to people with an interest in understanding cybersecurity issues with emphasis in areas such as cyber warfare, cyber defence, ethical hacking, network forensics and information security management. The programme will provide students with the specialised knowledge required, including theory, technologies and relevant design techniques, as a prerequisite for designing secure networks.

During the programme students will have the opportunity to apply their theoretical knowledge through specialised physical, virtual and remote security laboratories in which they will be able to carry out activities such as reconnaissance, network scanning and exploitation exercises, and investigate the usage and behaviour of security systems such as Intrusion Detection Systems. As part of the programme, students will also develop generic and domain-specific research techniques and skills required for successfully completing their final year MSc Thesis project.

Cyber Incident Handling	2	10
Practical Cryptography	2	10

YL= YEAR LONG

*Also available in Summer Semester

The University reserves the right to make amendments to programmes in order to improve the quality of learning content and outcomes.

Career Options

Typically, Cybersecurity professionals can be employed by telecommunication, IT and technology companies, network operators and network equipment vendors, consultancy agencies and government departments, as well as any other organisation that needs to protect its IT infrastructure and operations. Cybersecurity is part of nearly every discipline from defence and intelligence to healthcare and aerospace.

Collaboration with the European Citizens Association

As part of its social responsibility, the University of Central Lancashire Cyprus (UCLan Cyprus) proudly announces its collaboration with the European Citizens Association (ECA), supporting its aims to safeguard and promote the European Union's fundamental values and to

MSc Data Analytics + SAS Joint Certificate

Data Analytics is the science that allows decision makers to unveil new business insights by examining large amounts of data to uncover hidden patterns, correlations and other important insights. This course is designed to provide graduates and working professionals with knowledge and a diverse set of skills that span across all layers of the knowledge discovery stack including storage, mining, analytics, decision support frameworks and visualisations, as well as practical experience with modern tools.

In particular, students will learn how to (i) analyse large data sets and summarize their main characteristics with the use of attractive data visualisations; (ii) design and create databases that allow organisations to efficiently manage and query their enterprise data; (iii) discover patterns in large data sets with established techniques from various fields such as statistics, machine learning and artificial intelligence; and (iv) understand today's turbulent business environment and learn how modern BI tools enable organisations to survive and excel.

SAS Joint Certificate in Business Intelligence and Data Mining. The programme enjoys a strong collaboration with SAS Institute Inc. and as a result, our students have the opportunity to receive the SAS Joint Certificate in Business Intelligence and Data Mining. Such a certificate enhances our graduates' employability and competitiveness in the local and international market.

Industry Engagement

Collaboration between the university and the industry is an integral part of the programme, ensuring our graduates fulfil industry requirements and have strong, relevant technical skills. The collaboration exists in many forms such as guest lectures, visits to organizations and jointly supervised thesis projects. Such activities provide a strong complement to the students' academic studies and an advantage in future employment opportunities.

MODULES	SEMESTER	ECTS
COMPULSORY		
Master's Project	2,3	30
Critical Analysis	1	10
Business Intelligence and Data Analytics	1	10
Enterprise Data Management	1	10
Exploratory Data Analysis	2	10
Knowledge Discovery	2	10
OPTIONAL		
Information Security Management	2	10
Advanced Topics in Human Computer Interaction	2	10
ERP Systems	1	10
Strategy and International Management	2	10
e-Marketing	2	10
Leadership and Management	1	10
UX Away from the Desktop	2	10

YL= YEAR LONG

The University reserves the right to make amendments to programmes in order to improve the quality of learning content and outcomes.

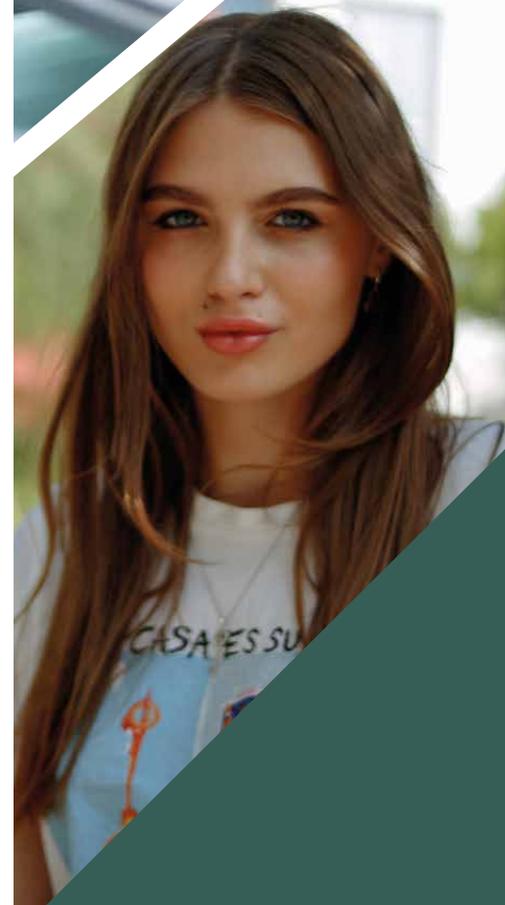

Career Options

This course is designed to provide graduates and working professionals with skills that enable them to organise, analyse, explore, interpret and visualise their data, as well as acquire practical experience with modern tools. These skills can be used in virtually every industry domain that uses data, such as Banking Consumer, Healthcare, Energy, Manufacturing, Technology, etc.

Additionally, the course provides a multitude of career options in both national and international data analytics companies such as Data Analytics Business Consultant, Data Analytics Architect, Data Engineer, Data Solution Architect, Data Analyst, Analytics Associate, Business Intelligence and Analytics Consultant, Metrics and Analytics Specialist, and many more.

Distance Learning Coming Soon

MSc Forensic Psychology

The MSc Forensic Psychology is a unique programme designed to prepare students for numerous diverse or specific careers within the general context of the Criminal Justice System. The programme is built around the fundamental theoretical, methodological and applied areas of Forensic Psychology.

In terms of the programme philosophy, the MSc Forensic Psychology reflects the academic skills underpinning the application of psychology to a forensic setting. It provides a strong emphasis on the application of Forensic Psychology in professional practice and how theoretical concepts are applied. Furthermore, the programme attends to victims and offenders. With regard to the latter, it follows the progression of an offender from their first contact with the criminal justice system until their eventual release into the community and/or transfer to conditions of less security. Attention is given to the victim and pre-trial issues (including civil justice). The role of on-going assessment, intervention and through-care are emphasised throughout the curriculum.

To foster professional growth, the programme places a strong emphasis upon developing professional report writing and presentation skills, methodological rigour, research expertise, independent learning and critical thinking. To facilitate this, students will be exposed to a learning and research environment that is rich in mentoring opportunities from members of the programme team with academic and/or practical forensic experience.

Within the programme, students holding an undergraduate degree in Psychology have the option to take the practical experience module, which includes 1000 hours of supervised practical training.

MODULES	SEMESTER	ECTS
COMPULSORY		
Advanced Methods in Psychology	1&2	20
Advanced Forensic Psychology Project	YL	20
Psychology and the Legal System	1	7.5
Personal Attributes of Offenders and Victims	1	7.5
Forensic Risk Assessment	1	10
Professional Practice: Forensic Consultancy and Supervision	2	5
Psychology, Investigation and the Courtroom	2	10
Violent and Sexual Offenders: Intervention	3	5
Forensic Mental Health	3	5
OPTIONAL		
Practical Experience	Y2	40

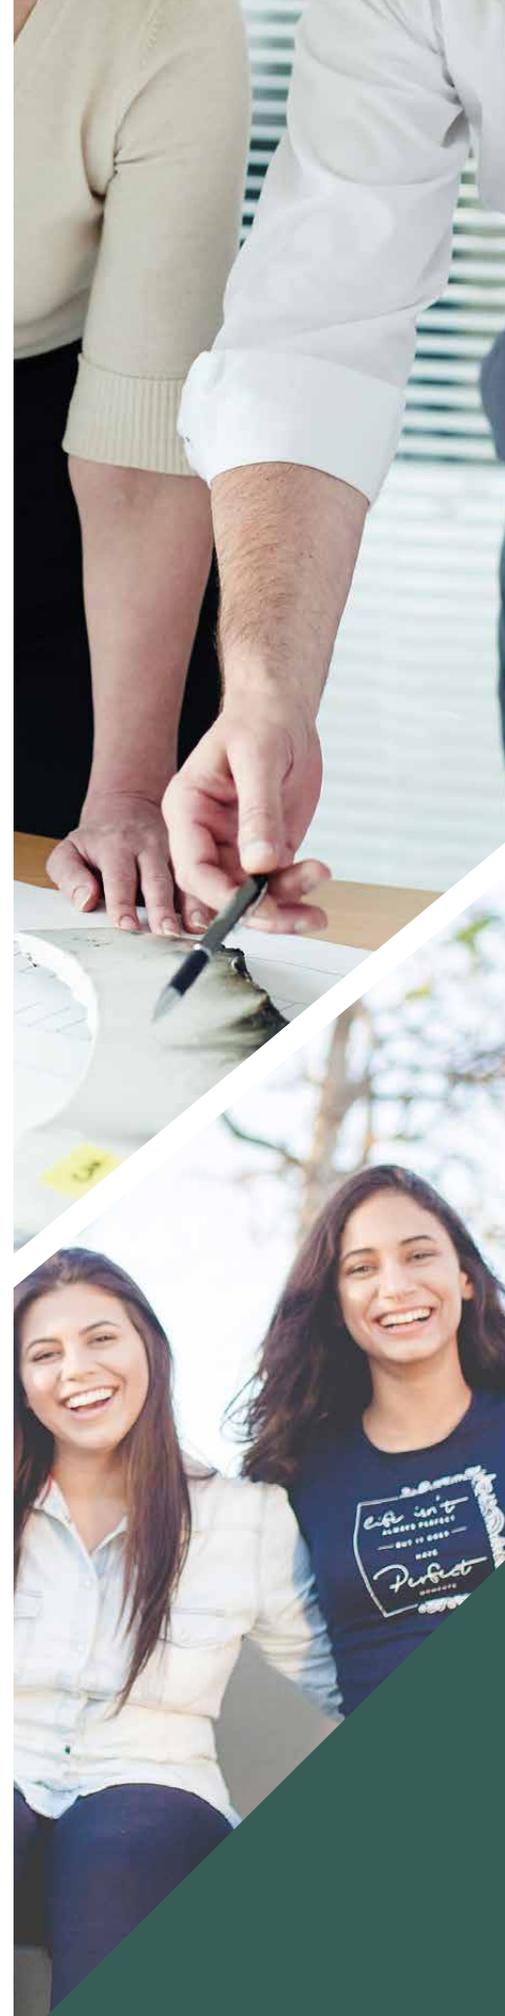

YL= YEAR LONG

The University reserves the right to make amendments to programmes in order to improve the quality of learning content and outcomes.

Career Options

The course covers a range of forensic psychology topics and allows candidates to strengthen the knowledge and skills that are essential for becoming Certified Forensic Psychologists. The course has been specifically designed to reflect the academic skills required to apply psychology to a forensic setting, including universities, prisons, secure hospitals, probation, police services and the courts.

Overall, the course can prepare students for numerous diverse or specific careers in the public as well as the private sector. It provides graduates with the necessary skills and knowledge to pursue careers within the general context of the Criminal Justice System. Students who complete the practical experience module (1000 hours of supervised training) will be able to become registered Forensic Psychologists and practise the profession in Cyprus.

MSc Sport & Exercise Sciences

The MSc in Sport and Exercise Sciences is designed to develop students' knowledge in the area of sport and exercise science with emphasis in exercise based rehabilitation and musculoskeletal management and prevention. Injury prevention and management is a major concern among fitness professionals and sports teams as it can be considered one of the major economic burdens due to the direct and indirect costs it incurs.

The programme combines an integrated curriculum with state-of-the-art learning material and facilities to further the knowledge, skills and abilities of sport science graduates, sports rehabilitators, sport therapists, physiotherapists and other health professionals currently working in the area of sports injury rehabilitation and prevention. The programme also incorporates hands on practical sessions for the application of the theoretical knowledge gained. As a result, programme graduates are well equipped for careers in any type of fitness industry or business, since they have knowledge on the complete spectrum of the theoretical background and management of sporting injuries and exercise rehabilitation. Furthermore, graduates will possess the key theoretical exercise rehabilitation skills along with their practical applications for special populations, such as diabetics, heart disease patients, stroke patients and individuals suffering from decreased mobility due to neurological conditions.

MODULES	SEMESTER	ECTS
COMPULSORY		
Research Project for Sport Exercise & Nutritional Scientists	YL	30
Research Methods for Sport, Exercise & Nutritional Science	YL	20
Advanced Practitioner Skills for Sport & Exercise Scientists	YL	30
OPTIONAL		
Management Strategies for Sport Injuries	1	5
Prevention Strategies for Sports Injuries	1	5
Exercise for Special Population Groups	1	5

YL= YEAR LONG

The University reserves the right to make amendments to programmes in order to improve the quality of learning content and outcomes.

Career Options

Upon successful completion of the MSc Sport and Exercise Sciences, graduates will be able to take a lead role in sports injury rehabilitation and make a difference for their clients. The programme prepares graduates for numerous diverse or specific careers, including but not limited to, personal trainers for special populations, specialists at rehabilitation centers, assistants to physiotherapy centres, and fitness coaches at professional sports teams. In addition, graduates will be able to work in public enterprises, hospitals and sport organizations. Also, given the increasing number of private fitness enterprises in Cyprus that are concentrating in special populations, currently, there is a local need for specialists in sports and exercise rehabilitation.

COMING SOON

BSc (Hons) Media Production

Do you want to explore media production and technologies across video, audio, graphics, multimedia and television? Our BSc (Hons) Media Production is an industry-focused programme that equips you with the skills, knowledge and experience you need to join the media production crews of tomorrow.

UCLan's BSc (Hons) Media Production was ranked in the Top 5 in the UK and 1st in the North West, for student satisfaction (Complete University Guide 2021).

In the last few years, media and communication related practices are becoming increasingly popular both in Cyprus and Internationally. With the media industry going through a rapid transformation, there has never been a better time to enter the media production field. The rise of online platforms, along with the digital innovations within the traditional media giants, have created a need for highly skilled media production professionals who can adapt and progress with the times, while also producing media content with a particular focus on digital innovation and emerging technologies. Through the highly practical, research-informed and industry-informed curriculum as well as our state-of-the-art facilities, you will be able to combine knowledge of production processes and techniques with an awareness of current industry practices and technical standards. While working in our 4K-ready, broadcast standard television and audio production studio, you will have multiple opportunities to be creative, producing a body of work that will showcase the breadth of your diverse craft skills and help you launch your career in media and television production.

YEAR 1

MODULES	SEMESTER	ECTS

Television Studio Production	YL	10
Computer Graphics	YL	10
Audio Production	YL	10
Video Production	YL	10
Multimedia Production	YL	10
Contextual Studies	YL	10

YL= YEAR LONG

The University reserves the right to make amendments to programmes in order to improve the quality of learning content and outcomes.

Career Options

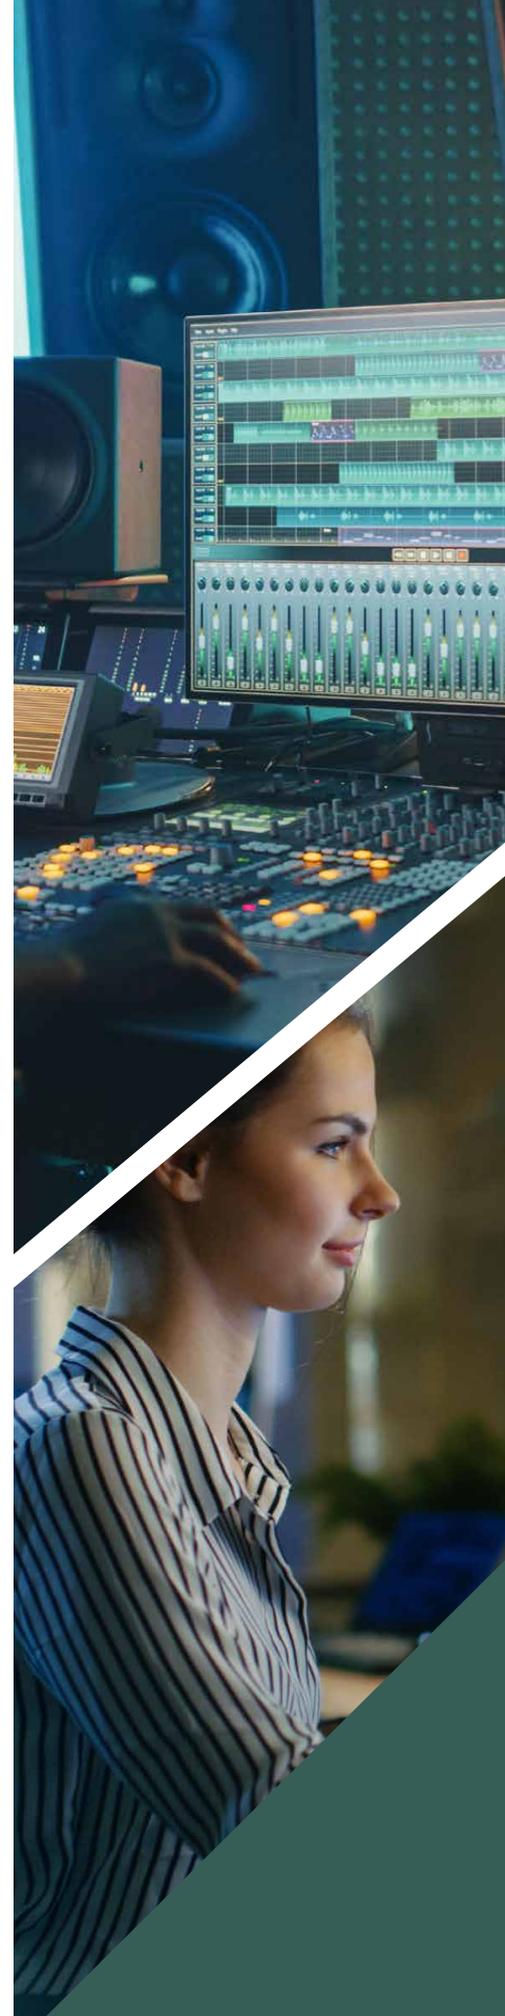

With the rapid advancement of technologies, qualified, skilled and media literate professionals are becoming more and more essential for almost all industry sectors. As a result, currently, there is high employability potential for students studying Media Production, and this is expected to continue rising as information communication technologies push into new frontiers.

The programme's content diversity will equip graduates with the necessary expertise to be employed in different sectors (industry, private or government) and as part of different departments, including media production, media post-production, marketing, digital or multimedia. Additionally, graduates can be employed in digital agencies, multimedia agencies, media groups, TV channels, animation studios, radio stations, marketing agencies, consultancy firms or even start their own media/digital media related business.

Employability is also embedded in the programme, which contains several features with emphasis on continuous learning and personal development, reflective practice, teamwork skills and problem-solving skills, through hands-on applied projects. The broad applicability of the programme's curriculum, combined with the personal capability that the programme engenders, creates highly competent individuals whose value can be recognised by employers.

Recent graduates of the programme in our mother University (UCLan UK) have taken up roles such as vision mixer, video producer, camera operator, radio DJ, graphics operator, presentation scheduler, editor, compositor, and studio operative, for employers such as Al Jazeera, BBC, Ideal World TV, BT Sports, and Sky Sports.

Communication and Media Studies at the University of Central Lancashire is ranked 1st in the North West and in the Top 10 in the UK for graduate prospects (Complete University Guide, 2022).

University of Central Lancashire, UK

Building on strong foundations

The University of Central Lancashire (UCLan) in Preston was founded in 1828 as the Institution for the Diffusion of Knowledge. 'Ex solo ad solem', or in translation, 'From the Earth to the Sun', has been its motto ever since – helping people from all walks of life to make the most of their potential is what UCLan is all about.

UCLan has evolved over the years to become a world class institution, recognised with its inclusion in the 2010 QS World Rankings – the first Modern University in the UK to gain this status. With 11 areas of research judged 'world leading' in the most recent Research Assessment Exercise, UCLan has the global recognition of its peers, with a focus on applied research, including the identification of human remains in mass disasters, the development of new sign languages, and a variety of health-related research initiatives that are helping to change lives around the world.

Amongst its programme portfolio of some 500 Undergraduate and 200+ Postgraduate courses, UCLan has been at the forefront of developing degrees in the emerging disciplines of Journalism, Fashion, Forensics and Sports Science. The range of excellence extends to include the likes of Pharmacy, Architecture, Astrophysics and the first new School of Dentistry to be launched in the UK in more than a century.

The University aims to create the perfect blend of knowledge, practical experience and relevance to equip its graduates with the confidence and skills they need to get ahead in the world of work. Not only are employability skills embedded into every degree course, but also the sector-defining 'future' careers and employability service offers help and advice, courses and work experience opportunities to help UCLan graduate CVs to stand out from the pack. Capital investment in outstanding facilities and a dedicated student support service, the 'i', combine to help UCLan be awarded the accolade 'Times Higher Top Modern University for Student Experience'.

A truly global institution, UCLan's student body includes more than 120 nationalities; its partnership network extends to 125 countries in North America, Europe, Africa, Asia and Australia; it runs 100+ student exchange programmes; it has a new campus in Cyprus and further campuses are being developed in Thailand and Sri Lanka. The University encourages and nurtures originality, from its ground-breaking Energy Management partnership with BAE Systems, to its launch of the world's first International Fashion Institute and the UK's first MBA in Fashion and its proud record of student business start-ups.

With a world class academic reputation firmly rooted in relevance, UCLan is focused on a future of providing innovative thinking for the real world.

Some key facts about UCLan.

UCLan breaks into the top 6.8% of worldwide universities.

The Centre for World University Rankings (CWUR) has unveiled its latest international figures and ranked UCLan in the top 6.8% of all worldwide Universities.

Perhaps UCLan's most publicly acknowledged achievement so far, came when UCLan received three Times Higher Education awards - widely regarded as the Oscars of the higher education sector - for Best International Collaboration of the Year, Excellence and Innovation in the Arts and Most Innovative Contribution to Business-University Collaboration. UCLan was the only University to win three awards, so this is described as an excellent achievement.

UCLan was highly rated in the Quality of Faculty category, which measures the number of academics who have won major international awards, prizes and medals; and the Quality of Education section, which is measured by the number of a University's alumni who have won major international awards, prizes and medals relative to the University's size.

UCLan scored highly for its alumni employment and was praised for the number of highly cited research papers. Professor Gai Murphy, UCLan Pro Vice-Chancellor (Student Experience), said: "It's great news for the University that we've broken into this list for the first time. It's a fantastic achievement to be among the world's top higher education institutions and one we're very proud of."

Quality standards confirmed

The UK's Quality Assurance Agency (QAA) for Higher Education has confirmed the quality and standards of provision at UCLan. The review identified a number of examples of good practice, including the availability of international study opportunities for all students; and the approach taken by the University to encourage applicants

from a wide range of backgrounds and the methods used to enhance student employability. The review also highlighted the ways the University supports its partner organisations in the UK and overseas, which include regular meetings between senior staff, the sharing of best practice, and the opportunities and support available to staff at partner organisations to continue their professional development.

A successful QAA review means that the University can display the QAA Quality Mark, indicating to UK and international students that the University meets national requirements for standards and quality.

**Institute of Professional Studies
at UCLan Cyprus**

The academic information contained in this prospectus is correct as at the time of printing.
The University reserves the right to make amendments to programmes in order to improve the quality of learning content and outcomes.

Welcome to **IPS**, **The Institute of Professional Studies**

We, at the Institute of Professional Studies, serve as a hub that bridges education with industry, by combining academic knowledge with technical training. All of us at the Institute are committed to provide students, not only with the necessary knowledge, but also with the technical skills and competences, the abilities and the experiences that will allow them to pursue a career in the local and the international market in their field of expertise.

Our Instructors compose a group of experienced academics in higher technical education as well as specialized and highly qualified professionals from the local and international industry, aiming to transfer both the knowledge and experience to the students during their studies for their proper professional development.

Most importantly, we have been actively working on the creation of a network with multinational organisations and certification bodies with a long presence in the local and international industry, such as TUV Cyprus and ARI Cyprus to ensure the quality of education provided to students and to certify their skills by internationally recognised organisations.

Mr. Constantinos Voniatis

*Manager of Institute of Professional Studies
at UCLan Cyprus*

Programmes offered

PROFESSIONAL DIPLOMA IN AGRICULTURE/AGRIBUSINESS

The Professional Diploma in Agriculture/Agribusiness aims to provide students with the technical knowledge and practical skills required for a career in the Agriculture sector. Through this diploma, the Institute of Professional Studies aims to supply the sector with graduates who can lead and develop good agricultural practices with an ecological mind-set.

Language of Studies: **Greek**

Accreditations: Accredited by the Cyprus Agency of Quality Assurance and Accreditation in Higher Education (CYQAA)

Supported by: The Ministry of Agriculture, Rural Development and Environment and The Agriculture Research Institute

- Communications, Control and Digital Signal Processing
- Mechanical Engineering and Design
- HSE International Qualifications

PROFESSIONAL DIPLOMA IN AUTOMOTIVE MECHANICS

The purpose of this Professional Diploma is to provide students with a deep understanding of the automotive science and technology discipline and introduce them to the functional fundamentals of modern automobile engines and electronic systems. Through their practical training, students will learn about the proper use of tools and automobile vehicles diagnostics, obtaining repair and maintenance, as well as garage management skills.

Language of Studies: **Greek**

Accreditations: Accredited by the Cyprus Council of Quality Assurance and Accreditation in Higher Education (CYQAA)

Supported by: Local Automotive Industry Partners
